Instructions for the Final Project

6771 Reinforcement Learning (Fall 2025)

1 Presentation (Deadline: December 12)

For the final presentation, we have created a shared space in *panopto* where every group can record and upload their video, and have discussions.

### 1.1 Accessing the shared space

The link to the shared folder is

`https://uva.hosted.panopto.com/Panopto/Pages/Sessions/List.aspx?folderID=148bef5d-d6d9-431c-b541-b3a800547f74.`

Please click the link above. If you successfully see the folder, then you already have the access (Congratulations).
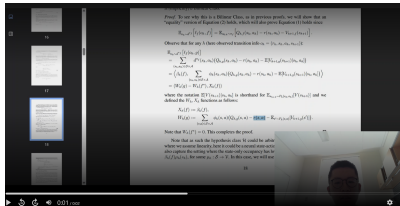

If not, it's likely because you haven't used Panopto before, which prevents me from giving you access. Please still click the above link, and click an "Authorize" button when you see something like "Panopto is requesting access to your account." After this, I'll able to give you access. Please do so **as soon as possible**, and **notify me** (course instructor) after you've done this authorizing step.

While every group only needs to upload one video, *every member* has to have access to the shared folder, as everyone will need to join the discussions.

1.2 How to record or upload a video

Record in browser You're able to record in browser by clicking the "Create" button `+ Create` and choose "Panopto Capture." After the recording, your video will automatically be in the shared folder.

One thing noticed in my own attempt: if you record in browser and open the camera, the camera view will occupy a large portion of the screen (like below), and your slide might be blocked. If that's the case, please turn off the camera, or find other solution to avoid this.

Record by yourselves and upload You can also upload your own video recordings by choosing "Upload Media."

1.3 Length

The suggested length is 10-15 minutes. Shorter is fine but not longer.

1.4 Title

Entitle the video as "Project Name (all group members' names)"

2 Presentation Discussions (Deadline: December 19)

Please watch the presentation of other groups, and leave you comments or questions in Panopto.

3 Report (Deadline: December 17)

Write a report in NeurIPS format with at most 8 pages, excluding references and unlimited amount of appendix. Shorter than 8 pages is absolutely fine — don't make your report longer than needed just to reach the limit. Try to
